

King&Pro 「橡皮布与底衬」系列 「Blanket & Packing」series

印刷橡皮布 Printing Blanket

- 高稳定性结构设计，专为高速印刷研发。具备卓越的网点还原力与压缩回弹性，确保套印精准
- High-stability structure engineered for high-speed presses. Features excellent dot reproduction and compression recovery for precise registration

双层 TPU 印刷底胶 Double TPU Layer Under packing

- 采用尖端双层 TPU 技术，提供极高的尺寸稳定性。耐化学溶剂浸蚀，且在高压连续运作下保持不变形
- Utilises advanced double TPU layer technology for extreme dimensional stability. Solvent-resistant and maintains shape under high-pressure continuous operation

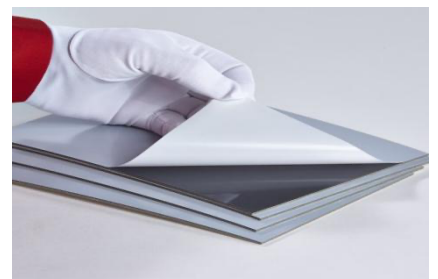

水上光版 Coating Blanket

- 专为全覆盖与局部上光优化。表面层具备极佳的耐 UV 与水性光油腐蚀性，能提供均匀、高亮度的涂布效果
- Optimised for both full and spot coating. The surface layer is highly resistant to UV and aqueous varnishes, ensuring uniform and high-gloss application

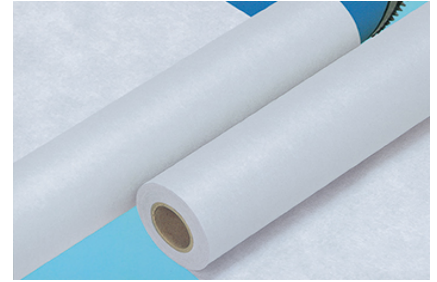

水油座底衬胶布 Coating unit packing

- 具备优异的压力缓冲性能，能有效吸收印刷过程中的震动，保护滚筒并延长上方橡皮布的使用寿命
- Features superior pressure buffering. Effectively absorbs vibrations during printing to protect cylinders and extend the life of the top blanket

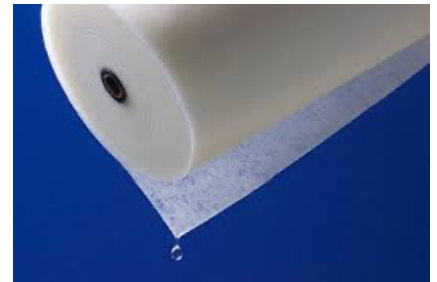

橡皮布干式清洗布
Washing Cloth

- 具备极高的吸附力与抗拉强度，完全不掉纤维。专为自动清洗系统设计，能彻底清除油墨与纸粉
- High absorbency and tensile strength with lint-free performance. Designed for automatic washing systems to remove ink and paper dust effectively

橡皮布湿式清洗布
Pre-moistened Washing Cloth

- 预先浸渍专用清洗剂，确保清洗过程更均匀且迅速。能大幅缩短停机时间并减少化学溶剂的浪费。
- Pre-soaked with specialised cleaning agents for uniform and fast cleaning. Significantly reduces downtime and chemical waste

KWA-18 普通 / UV 洗车水
Wash / UV Wash

- 强力去除传统与 UV 油墨残留，同时保护胶辊表面。低挥发（Low VOC）配方，符合国际环保与安全规范
- Powerful removal of conventional and UV ink residues while protecting the roller surface. Low VOC formula for environmental safety

KFS-25 免酒精润版液
IPA Free Fountain Solution

- 实现真正的无酒精环保印刷。具备稳定的乳化性能与优秀的防腐蚀保护，能显著降低生产成本
- Achieves true alcohol-free, eco-friendly printing. Features stable emulsification and corrosion protection to reduce production costs

King&Pro 「备用辊」系列 「Spare roller」 series

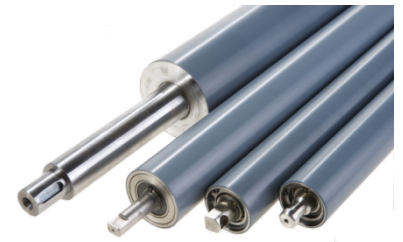

印刷胶辊 Rubber Roller

- 采用特殊橡胶配方，具备极强的抗溶剂溶胀性。Shore 硬度精准稳定，能快速达成水墨平衡，减少开机过桥纸张浪费
- Specialised rubber formula with high resistance to solvent swelling. Precise Shore hardness ensures fast ink-water balance and reduces start-up waste.

尼龙串墨辊 Nylon Oscillator Roller

- 硬质尼龙有优异的亲墨性且易于清洗，能有效抵御溶剂侵蚀
- Hard Nylon features excellent ink affinity and is easy to clean, effectively resisting solvent erosion.

镀铬辊 Chrome Roller

- 表面经过高硬度工业镀铬处理，极其耐磨。表面平整度达到微米级精度，确保传墨量与计量的极致精准。
- High-hardness industrial chrome plating for extreme wear resistance. Micron-level surface flatness ensures ultimate precision in ink transfer and metering.

网纹辊 Anilox Roller

- 采用高性能陶瓷喷涂与精密激光雕刻技术。具备极高的耐磨损性与精确的传墨穴容积（BCM），确保上光或印刷时涂布量的高度一致性
- Features high-performance ceramic coating and precision laser engraving. Offers exceptional wear resistance and accurate cell volume (BCM) to ensure highly consistent coating or ink application.

陶瓷墨斗辊 Ceramic ink duct roller

- 具备优异的表面亲墨性，确保墨量传递稳定，表面采用先进的工业陶瓷喷涂技术，并经过精密研磨或激光雕刻处理
- Features high-performance industrial ceramic spray coating with precision grinding or laser engraving. It offers excellent surface ink affinity to ensure stable and consistent ink transfer.

防刮替塑哑油

Anti-scratch Plastic-Replacement Matte Coating

- ◆ 高性能哑光涂料，专为替代塑料薄膜设计（替塑）。提供卓越的表面抗刮伤性与细腻的哑光触感，符合环保减塑趋势。
- ◆ High-performance matte coating designed to replace plastic films. Provides superior scratch resistance and a sophisticated matte finish, aligning with eco-friendly plastic reduction trends.

连线防爆水性底油

In-line Anti-cracking Primer

- ◆ 专为连线加工研发，具备极佳的渗透力与柔韧性。能有效防止包装盒折叠处爆线（裂纹），是高速生产中提升成品率的关键底油。
- ◆ Developed specifically for in-line processing with excellent penetration and flexibility. Effectively prevents cracking at folding scores, making it essential for increasing yield in high-speed production.

连线水性耐磨哑油

In-line Water-based Rub-resistant Matt Varnish

- ◆ 标准化连线上光方案。具有极佳的耐磨损性能，能保护印刷面在物流运输中不受摩擦损伤，同时保持稳定的光泽度。
- ◆ English: Standardized in-line coating solution. Features excellent rub resistance to protect printed surfaces from friction damage during logistics, while maintaining consistent gloss.

连线高光耐磨光油

In-line High Gloss Rub-resistant Varnish

- ◆ 兼具高亮度的视觉效果与耐磨性。适用于礼品盒等高端包装，使成品表面坚固耐用。
- ◆ English: Combines ultra-high visual gloss with superior wear resistance. Suitable for high-end packaging such as gift boxes, providing a mirror-like shine that is both durable and robust.
